Dear [redacted]

LOCAL GOVERNMENT OFFICIAL INFORMATION AND MEETINGS ACT Request: 2024-07

Thank you for your email of 8 February 2024 to the Carterton District Council requesting the following information:

> *"Re Temporary speed limits on Hughes Line Carterton.*
> *Thankyou Johannes for your time this morning in relation to my phone queries pertaining to the temporary speed limits on Hughes Line Carterton.*
> *As I stated I would follow up with this email with the base questions asked,*
> *They were as follows:*
> *1. What reason was the 70km/h temporary speed limit set for Hughes line?*
> *2. Was the temporary speed limit registered with the national register?*
> *3. I understand that there was a traffic Management plan set at the time for the temporary speed limit, I would like to respectfully request a copy of that plan.*
> *4. I would also like to respectfully request maintenance records for Hughes line from June 2023 to present date. (I acknowledge that the info for question #4 may take a little longer to collate)*
> *I also understand that you are in the process of the long term plan but any answers you are able to provide to me in the short term would be appreciated."*

Your request has been considered under the Local Government Official Information and Meeting Act 1987 (the Act). My response to your request is in the number order below.

1. What reason was the 70km/h temporary speed limit set for Hughes line?

The temporary speed limit was introduced to deal with the large traffic volume that resulted from SH2 construction and new Speed limits. The increased in traffic volume created a safety concern for road users and residents.

Temporarily reducing the speed limit to 70km meant that Hughes line was 10km/hr lower than SH2 (80km/hr) resulting in a less desirable route for SH2.

Since the implementation of the temporary signs traffic volumes and subsequently road user safety improved.

The significant increase in traffic volume also had a negative impact on the road resulting in increased maintenance cost.

2. ***Was the temporary speed limit registered with the national register?***

No.

3. ***I understand that there was a traffic Management plan set at the time for the temporary speed limit, I would like to respectfully request a copy of that plan.***

Attached as **Appendix One**, is the most recent Traffic Management Plan.

4. ***I would also like to respectfully request maintenance records for Hughes line from June 2023 to present date. (I acknowledge that the info for question #4 may take a little longer to collate).***

Attached as **Appendix Two**, is the maintenance records for Hughes line from June 2023 to 8 February 2024.

Please note, the Council proactively publishes LGOIMA responses on our website. As such, we may publish this response on our website after five working days. Your name and contact details will be removed.

Thank you again for your email 8 February 2024. You have the right to ask an Ombudsman to review this decision. You can do this by writing to info@ombudsman.parliament.nz or Office of the Ombudsman, PO Box 10152, Wellington 6143.

Yours sincerely

Geoff Hamilton
Chief Executive
Carterton District Council

Description of work activity

This TMP is for Fulton Hogan to install a 70km/h TSL on Hughes Line. Due to road works on SH2.

This is only a speed reduction, no physical works will be happening on Hughes Line.

Plant on Site (but not limited to)

- TTM Trucks
- Various small tools

Planned work programme

TTM Times	22/01/2024	Time	07:00	End date	15/04/2024	Time	17:00

APPROVED
CAR E947899
[redacted]
STMS Number 131730
Carterton District Council

16 January 2024

Consider significant stages, for example: • road closures • detours • no activity periods.	TTM Times *(times are approximate only)* TTM Installation: 07:00 – 08:00 TTM removal (once work is completed): 16:00 – 17:00 *Cyclists* There are no cycle lanes within this site, however cyclists will be considered when placing signs and TTM equipment. Cyclists can follow the same rules as vehicle traffic. *Delays and Queuing* No delays or queuing is expected during this work, using this TTM methodology.
Alternative dates if activity delayed	If Works are Postponed/Cancelled for any reason they will be rescheduled for the next fine Day/Night if within approved TMP dates.

Road aspects affected *(delete either Yes or No to show which aspects are affected)*

Pedestrians affected?	No	Property access affected?	No	Traffic lanes affected?	No
Cyclists affected?	No	Restricted parking affected?	No	Delays or queuing likely?	No

Proposed traffic management methods

Installation *(includes parking of plant and materials storage)*	*Preparation:* • STMS reviews approved TMP, identifies TMP is fit for purpose. • Full pre-start briefing with TM & work crews. • All required equipment is to be loaded onto the work vehicle in the correct order for site installation. • All equipment and plant are to be checked prior to departing the yard. Vehicle pre-starts will be documented on the daily vehicle pre-start checklist. *Site Arrival:* • STMS will carry out traffic counts to ensure traffic volumes are suitable and within threshold limits for this TMP. Site installation will be delayed if required. • Perform a drive through of the intended site and identify any additional potential risks. • Complete Fulton Hogan's TMP checklist to confirm this SSTMP is appropriate for the task. Document any minor changes required and/or gain approval for any significant changes. • Emergency services to be notified at least 30minutes prior to site installation. *Static closure installation guideline:* • Installation using an Lv1 mobile, work vehicle & shadow vehicle – (where required, if the STMS's risk assessment indicates that it is need) • Signs are to be placed on the left-hand side of the road as required; the first sign to be erected will be an advanced warning sign. • Detour signage must be installed after the warning signs. • The work vehicle (sign and equipment vehicle) to proceed along the left side of the road installing signage as per the site diagram/layout requirements. • The vehicles will then loop at a safe, suitable location to install relevant signage on the opposite side of the road as per the site diagram/layout requirements. • Relevant delineation and delineation signage to be installed around the working space after all other signage has been installed. • STMS to complete a drive through to check the site reflects the approved TMP/TMDs. • STMS to complete on site record and TMP checklist – document any further changes. • Work crew invited into the workspace and a handover is completed.

APPROVED

16 January 2024

Attended (Day/Night)	No required.
Unattended (day/night)	70km/h TSL, will be installed 24/7.
Detour route	Not required. Does detour route go into another RCA's roading network? No. If Yes, has confirmation of acceptance been requested from that RCA? Not Required. Note: Confirmation of acceptance from affected RCA must be submitted prior to occupying the site.
Removal	*Static closure removal guideline:* • TTM removal using an Lv1 mobile, work vehicle and shadow vehicle - (where required, if the STMS's risk assessment indicates that it is need) • Signs are to be removed from the left-hand side of the road as required; the last sign to be removed will be the advanced warning signs. • The work vehicle (sign and equipment vehicle) to proceed along the left side of the road removing signage as per the site diagram/layout requirements. • The vehicles will then loop at a safe, suitable location to commence the next "loop" procedure as below. • STMS to complete a final drive through to check all TTM equipment has been fully removed. • STMS to complete on site record. • Emergency services to be notified 30min prior to site removal.

Proposed TSLs *(see TSL decision matrix for guidance)*

	TSL Details as required Approval of Temporary Speed Limits (TSL) are in terms as required by Section 7 of Land Transport Rule: Setting of Speed Limits 2022 (List speed, length and location)	Times *(From and to)*	Dates *(Start and finish)*	Diagram ref. no.s *(Layout drawings or traffic management diagrams)*
Attended day/night	Not Required.	Not Required.	Not Required.	Not Required.
Unattended day/night	A temporary maximum speed limit of 70km/h is hereby fixed for motor vehicles traveling over the length of 5367m between 0.311 to 5.678 on Hughes Line, Clareville, Carterton. (70km/h repeaters every 400m)	24 Hours	22/01/2024 To 15/04/2024	TMD 2, 3, 4,5, 6, 7,8
	A temporary maximum speed limit of 70km/h is hereby fixed for motor vehicles traveling over the length of 148m between 1.305 to 1.453 on Cornwall Road, East Taratahi, Carterton.	24 Hours	22/01/2024 To 15/04/2024	TMD 2
	A temporary maximum speed limit of 70km/h is hereby fixed for motor vehicles traveling over the length of 193m between 1.075 to 1.268 on East Taratahi Road, East Taratahi, Carterton.	24 Hours	22/01/2024 To 15/04/2024	TMD 4
	A temporary maximum speed limit of 70km/h is hereby fixed for motor vehicles traveling over the length of 75m between 0.000 to 0.075 on Francis Line, Clareville, Carterton.	24 Hours	22/01/2024 To 15/04/2024	TMD 8
TSL duration	Will the TSL be required for longer than six months? *If yes, attach the completed checklist from section I-18: Guidance on TMP Monitoring Processes for TSLs to this TMP.*			No

Positive traffic management measures
Once the site has been installed additional measures available to the STMS if required are; (these also to be documented on OSR) • Using approved traffic control devices (eg flashing beacons, flares, illuminated signs) • Additional advance signage may be used outside the required advanced warning signage to promote further awareness of the Closure. • Additional delineation (reduced cone spacings through the work area) may be required to help improve public and site safety

Contingency plans		
Generic contingencies for: • major incidents • incidents • pre-planned detours.	Major Incident A major incident is described as: • Fatality or notifiable injury - real or potential • Significant property damage, or • Emergency services (police, fire, etc) require access or control of the site.	Actions The TMO/STMS must immediately conduct the following: • stop all activity and traffic movement • secure the site to prevent (further) injury or damage • contact the appropriate emergency authorities • render first aid if competent and able to do so • notify the area TMC • under the guidance of the officer in charge of the site, reduce effects of TTM on the road or remove the activity if safe to do so • re-establish TTM and traffic movements when advised by emergency authorities that it is safe to do so • Comply with any obligation to notify WorkSafe.
	Incident An incident is described as: • excessive delays - real or potential • minor or non-inquiry accident that has the potential to affect traffic flow • Structural failure of the road.	Actions The TMO/STMS must immediately conduct the following: • stop all activity and traffic movement if required • secure the site to prevent the prospect of injury or further damage • notify the area TMC • TMO/STMS to implement a plan to safely remove TTM and to establish normal traffic flow if safe to do so • Re-establish TTM and traffic movements when it is safe to do so and when traffic volumes have reduced.

	Detour If because of the on-site activity it will not be possible to remove or reduce the effects of TTM once it is established a detour route must be designed. This is likely for: • excessive delays when using an alternating flow design for TTM • redirecting one direction of flow and / or • Total road closure and redirection of traffic until such time that traffic volumes reduce and tailbacks have been cleared. The risks in the type of work being undertaken, the risks inherent in the detour, the probable duration of closure and availability and suitability of detour routes need to be considered. The detour and route must be designed including: • pre- approval form the TMC's whose roads will be used or affected by the detour route • Ensure that TTM equipment for the detour - signs etc are on site and pre-installed.	**Actions** When it is necessary to implement the pre-planned detour the TMO/STMS must immediately undertake the following: • Notify the TMC and / or the engineer when the detour is to be established • Drive through the detour to check that it is stable and safe • Remove the detour as soon as it practicable and safe to do so and the traffic volumes have reduced and tailbacks have cleared • Notify the TMC and / or the engineer when the detour has been disestablished and normal traffic flows have resumed.
	Note also the requirements for no interference at an accident scene: In the event of an accident involving serious harm the TMO/STMS must ensure that nothing, including TTM equipment, is removed or disturbed and any wreckage article or thing must not be disturbed or interfered with, except to: • save a life of, prevent harm to or relieve the suffering of any person, or • make the site safe or to minimise the risk of a further accident; or • maintain the access of the general public to an essential service or utility, or • prevent serious damage to or serious loss of property, or • Following the direction of a constable acting in his or her duties or act with the permission of an inspector.	
Other contingencies to be identified by the applicant *(i.e. steel plates to quickly cover excavations)*	*Weather*	The TMO/STMS will suspend or re-evaluate the methodology of the works if weather conditions e.g., rain, fog etc., will adversely affect safety, i.e., If CSD (3 x PSL) is not achieved during site set-up, or sign visibility not achieved after site set up. Work can recommence only after the all clear has been given by the TMO/STMS.

Authorisations				
Parking restriction(s) alteration authority	Will controlled street parking be affected?	No	Has approval been granted?	N/A
	Not applicable			
Authorisation to work at permanent traffic signal sites	Will portable traffic signals be used or permanent traffic signals be changed?	No	Has approval been granted?	N/A
	Not applicable			
Road closure authorisation(s)	Will full carriageway closure continue for more than 5 minutes (or other RCA stipulated time)?	No	Has approval been granted?	N/A
	Not applicable

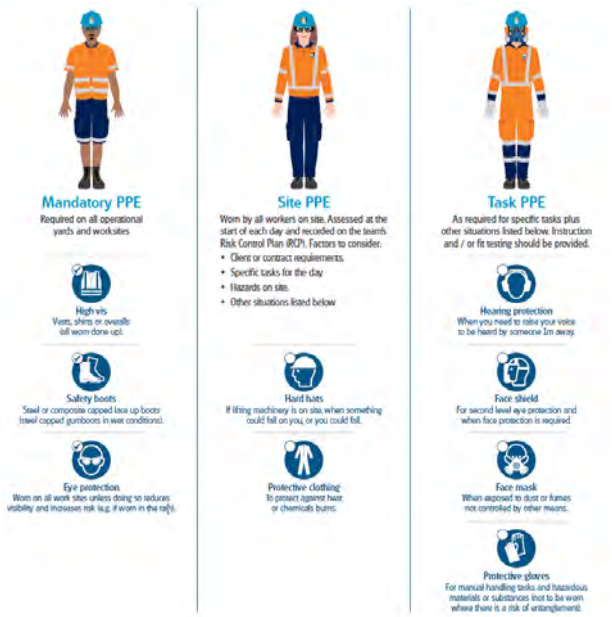
Bus stop relocation(s) – closure(s)	Will bus stop(s) be obstructed by the activity?	No	Has approval been granted?	N/A
	Not applicable			
Authorisation to use portable traffic signals	Make, model and description/number	*Not applicable*		
	NZTA compliant?	*Not applicable*		
EED				
Is an EED applicable?	Not required.	EED attached?	Not required.	
Delay calculations/trial plan to determine potential extent of delays				
Not Applicable.				
Public notification plan				
No required.				
Public notification plan attached?	No			
On-site monitoring plan				
Attended *(day and/or night)*	Not required.			
Unattended *(day and/or night)*	STMS to check site at the completion of each day and check that the site is set out in compliance to the approved TMP and all hazards are adequately isolated. The site is to be checked at least once in a 24hr period. These checks may be required more often in adverse weather and the risk is deemed higher.			
Method for recording daily site TTM activity *(eg CoPTTM on-site record)*				
• Risk Control Plan • A CoPTTM onsite daily record (attached to this TMP) OR eForm On Site Record • TMP Checklist				
Site safety measures				

Personal Safety / PPE

Hi-Viz and steel cap lace up boots are required as a minimum.

Fulton Hogan minimum PPE standards must be met. Site specific PPE may be required, this will be documented on the RCP.



Site Visitors

All site visitors must meet with the STMS for a site induction prior to entering the site. The workspace foreperson will carry out a visitor induction if the visitor is requiring to enter the workspace.

Plant and equipment

All plant must meet FH standards and be issued with a current Fulton Hogan Safe Certification.

Statement from temporary safety barrier installation designer attached	Attached Not attached	No	If yes, has the temporary safety barrier system been designed by an installation designer and independently reviewed as being fit for purpose?	No
	Statement from temporary safety barrier installation designer attached			Not Required

Other information
All TMP changes are to be recorded and the TMC informed immediately of any significant modifications (e.g. change of TSL) to TTM measures not included in the approved TMP. All other minor changes are to be noted on the TMP checklist.

Qualifier for engineer or TMC approval

Approval of this TMP authorizes the use of any regulatory signs included in the TMP or attached traffic management diagrams.

This TMP is approved on the following basis:

1. To the best of the approving engineer's/TMC's judgment this TMP conforms to the requirements of CoPTTM.
2. This plan is approved on the basis that the activity, the location and the road environment have been correctly represented by the applicant. Any inaccuracy in the portrayal of this information is the responsibility of the applicant.
3. The TMP provides so far as is reasonably practicable, a safe and fit for purpose TTM system.
4. The STMS for the activity is reminded that it is the STMS's duty to postpone, cancel or modify operations due to the adverse traffic, weather or other conditions that affect the safety of this site.
